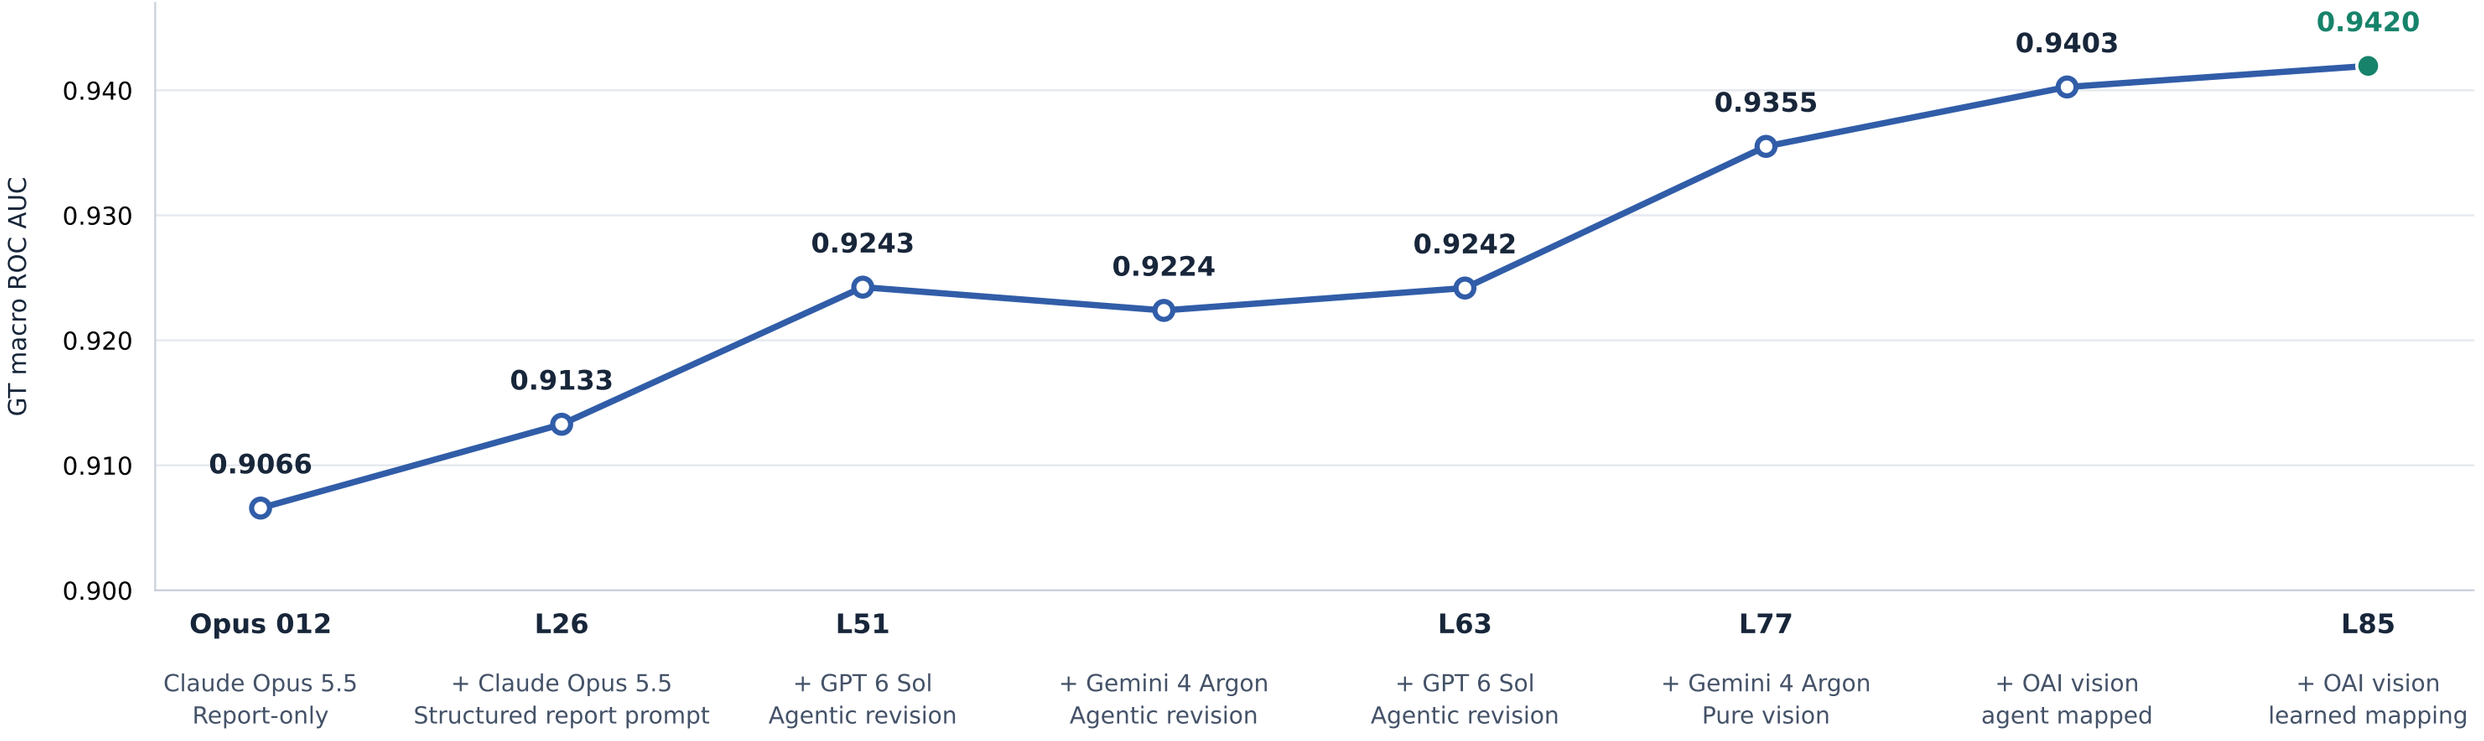
Gold-label quality across the label lineage

58 gold studies · 12 classes · raw probabilities before gold overrides



Intermediate blends: 0.6 × L51 + 0.2 × Gemini 4 Argon; 0.5 × L77 + 0.25 × OAI vision agent mapped

L77 updates Effusion, Synovitis and Baker’s. The OAI blends update both menisci, three OA compartments and Effusion.

Partial blends retain the stated weights; positive rescaling leaves ROC AUC unchanged.
